(54) CLAVICLE FIXING DEVICE

(57)Abstract:

PURPOSE: To provide a clavicle fixing device which is adjustable to be fit favorably to the front body side of a person from the part of the clavicle to the armpit.

CONSTITUTION: This device is provided with a shoulder pad part 11 formed in a belt, a pair of shoulder belts 12 and 12 successively arranged almost in a V shape at the upper end of the back pad part 11 and a catching means 13 to link the free end sides of the shoulder belts 12 and 12 to the lower end side of the back pad part 11 being allowed to load or unload or to adjust in length. The back pad part 11 is arranged along the back bone of a patient while the shoulder belts 12 and 12 are mounted on the part of the clavicle from the back side thereof and then, under the armpit. Here, pads 15 and 15 are mounted on the shoulder belts 12 and 12 adjustable in position to be put on an affected part.
